kinza.farid@educative.io

This Consulting Agreement (this “**Agreement**”) is made as of August 23, 2023 by and between Educative, Inc., a Delaware corporation (the “**Company**”), and André Hangalo (“**Consultant**”).

1. **Consulting Relationship**. During the term of this Agreement, Consultant will provide consulting services to the Company as described on Exhibit A attached hereto (the “**Services**”).
2. **Fees and Expenses**. As consideration for the Services to be provided by Consultant, the Company shall pay to Consultant as described on Exhibit A. Consultant shall not be authorized to incur on behalf of the Company any expenses and will be responsible for all expenses incurred while performing the Services unless otherwise agreed in writing by Company.
3. **Term and Termination**. Consultant shall serve as a consultant to the Company commencing on August 23, 2023, and ending on a mutually agreed upon date. Notwithstanding the above, either party may terminate this Agreement at any time upon written notice. In the event of such termination, Consultant shall be paid based on the last completed milestone in Exhibit A.
4. **Ownership of Work Product**. Consultant agrees that any and all Work Product (as defined below) shall be the sole and exclusive property of Company. Consultant hereby irrevocably assigns to Company all right, title and interest worldwide in and to any work product created, conceived, or developed by Consultant for Company in connection with the Services including all copyrights, patents, trademarks, and other intellectual property rights therein (the “**Work Product**”). Consultant retains

Help us improve by sharing your feedback.

no rights to use the Work Product and agrees not to challenge the validity of Company's ownership of the Work Product. If Consultant has any rights, including without limitation "artist's rights" or "moral rights," in the Work Product that cannot be assigned, Consultant hereby unconditionally and irrevocably grants to Company an exclusive (even as to Consultant), worldwide, fully paid and royalty-free, irrevocable, perpetual license, with rights to sublicense through multiple tiers of sublicensees, to use, reproduce, distribute, create derivative works of, publicly perform and publicly display the Work Product in any medium or format, whether now known or later developed. In the event that Consultant has any rights in the Work Product that cannot be assigned or licensed, Consultant unconditionally and irrevocably waives the enforcement of such rights, and all claims and causes of action of any kind against Company or Company's customers.

5. **License to Preexisting IP.** Consultant agrees not to use or incorporate into Work Product any intellectual property developed by any third party or by Consultant other than in the course of performing Services ("**Preexisting IP**"). In the event Consultant uses or incorporates Preexisting IP into Work Product, Consultant hereby grants to Company a non-exclusive, perpetual, fully-paid and royalty-free, irrevocable and worldwide right, with the right to sublicense through multiple levels of sublicensees, to use, reproduce, distribute, create derivative works of, publicly perform and publicly display in any medium or format, whether now known or later developed, such Preexisting IP incorporated or used in Work Product. Consultant represents and warrants that Consultant has an unqualified right to license to Company all Preexisting IP as provided in this section.
6. **Independent Contractor.** Consultant's relationship with the Company will be that of an independent contractor and not that of an employee. Consultant shall have full responsibility for applicable withholding taxes for all compensation paid to Consultant under this Agreement, and for compliance with all applicable labor and employment requirements with respect to Consultant's self-employment and form of business organization.
7. **No Authority to Bind Company.** Consultant acknowledges and agrees that Consultant has no authority to enter into contract that bind the Company or create obligations on the part of the Company without the prior written authorization of the Company.
8. **Confidentiality.** "Confidential Information" means information not generally known or available outside the Company or information and physical material entrusted to the Company in confidence by third parties, whether in writing, electronically, orally, or by observation. Consultant understands that during the term of the Agreement, Company will provide Consultant with information, including Confidential Information, that may be subject to legal claims. Consultant may not be able to perform its duties to Company. Consultant agrees, at all

Help us improve by sharing your feedback.

times during the term of the Agreement and thereafter, to hold such information in strictest confidence.

9. **Conflicts with this Agreement.** Consultant represents and warrants that (a) Consultant is not under any pre-existing obligation in conflict or in any way inconsistent with the provisions of this Agreement; (b) all Content is free of libel or other unlawful material, including matter that may be construed as invasion of privacy, violation of a right of publicity, copyright, patent, or trademark infringement, and/or misappropriation of trade secret or any other right of a person or party; and (c) Consultant has obtained all necessary rights, licenses and consents to enable Consultant to grant the rights to the Content in this Agreement.

10. **Indemnification.** To the fullest extent permitted by law, Consultant agrees to indemnify and hold Company, its subsidiaries and affiliates, and each of their directors, officers, agents, contractors, partners and employees, harmless from and against any loss, liability, claim, demand, damages, costs and expenses, including reasonable attorney's fees, arising out of a breach of the representations and warranties in Section 9, Consultant's provision of Services, or the Content provided by or on behalf of Consultant.

11. **Miscellaneous.**

- a. **Amendments and Waivers.** Any term of this Agreement may be amended or waived only with the written consent of the Company.
- b. **Sole Agreement.** This Agreement, including the Exhibits hereto, constitutes the sole agreement of the parties and supersedes all oral negotiations and prior writings with respect to the subject matter hereof.
- c. **Notices.** Any notice required or permitted by this Agreement shall be in writing and shall be deemed sufficient when delivered personally or by overnight courier or sent by email upon customary confirmation of receipt.
- d. **Choice of Law; Venue.** The validity, interpretation, construction and performance of this Agreement shall be governed by the laws of the State of Washington, without giving effect to the principles of conflict of laws and the parties consent to exclusive jurisdiction and venue in the state and federal courts located in Seattle, Washington.
- e. **Assignment.** The Agreement will bind and inure to the benefit of each party's permitted successors and assigns. Neither party may assign this Agreement in whole or in part, without the other party's written consent, except that Company may assign this Agreement without consent in the event of a merger, acquisition, or sale of all or substantially all of Company's assets. Any attempt to assign this Agreement without the other party's written consent shall be null and void.

Help us improve by sharing your feedback.

will be null and void. Consultant will ensure that the rights and licenses granted to Company in this Agreement will survive Consultant's transfer or assignment of the Content and/or Pre-Existing IP to any other entity.

f. Counterparts. This Agreement may be executed in counterparts, each of which shall be deemed an original, but all of which together will constitute one and the same instrument.

The parties have executed this Consulting Agreement as of the date first written above.

EDUCATIVE, INC.	CONSULTANT

DESCRIPTION OF CONSULTING SERVICES COMPENSATION

DESCRIPTION OF SERVICES:

Develop text-based project with interactive elements on "Unleashing Django's Power: Building Agile Microservices". Please refer to the [author project guide](#) for more information. See outline below.

Create a project on the Educative platform, including submitting an outline and 25% work for initial review. Educative Content will review submitted tasks, provide feedback and approve to proceed at this milestone.

Deliverable Schedule:

- September 18, 2023 - Start Date
- September 25, 2023 - 25% Complete Rough Draft
- October 9, 2023 - 100% Complete Rough Draft
- October 30, 2023 - Review and Correction Incorporation* Complete
- November 13, 2023 - Ready for Launch

Help us improve by sharing your feedback.

* Incorporate review feedback from all editorial and technical reviews.

** Project is considered 'Ready for Launch' when it is approved for proofreading.

COMPENSATION:

Payment of 2000 USD will be paid against the below milestone schedule. Final payment will be made after all technical and editorial feedback has been incorporated, approved, and the project is marked as 'Ready for Launch' as deemed in the above explanation of 'Ready for Launch'.

Payment Schedule:

25% Milestone Completed = 25% payment

100% Milestone Completed = 25% payment

Project "Ready for Launch" = 50% payment

BONUS OPPORTUNITY:

(1) Bonus for early completion.

Educative will compensate the author an additional 10% of the compensation (above). Delivery will be calculated on the Deliverable Schedule (above) with the exception of delayed delivery due to Force Majeure cases. A project will be considered "early" when it is marked as 'Ready for Launch' at least one (1) business day prior to the Ready for Launch date provided in the Deliverable Schedule (above).

DESCRIPTION OF PROJECT OUTLINE

Project Title

"Unleashing Django's Power: Building Agile Microservices"

Problem Statement

In today's software development landscape, the need for scalable and resilient architectures is paramount. Microservices have emerged as a popular solution for building complex applications by breaking them down into smaller, independent services. However, designing and implementing microservices effectively can be a challenging task, especially when using the Django framework.

The problem lies in the lack of comprehensive resources that specifically focus on designing microservices with Django. While there are abundant tutorials and courses on Django itself, there is a need for a project-based learning experience that not only teaches the language and technology but also provides practical use cases for building microservices.

Prerequisites:

To fully engage with the "Design Microservices with Django" project, participants should have a solid understanding of Python programming and be familiar with the basics of the Django framework. Additionally, a basic understanding of web development concepts, RESTful APIs, and containerization (e.g., Docker) would be beneficial.

Inputs:

Participants will receive access to a curated set of learning materials, including tutorial videos, documentation, and code samples. They will also be provided with a project starter template and a comprehensive guidebook explaining the project's objectives and requirements.

Expected Outputs:

By the end of the project, participants will have gained the following skills and outputs:

1. In-depth knowledge of designing microservices architectures.
2. Ability to develop and deploy scalable microservices architectures.

Help us improve by sharing your feedback.

3. Proficiency in using Django Rest Framework for building RESTful APIs.
4. Understanding of containerization techniques (e.g., Docker) for microservices deployment.
5. Practical experience in implementing testing, logging, and monitoring strategies for microservices.
6. A fully functional microservices project, showcasing their skills and understanding of the subject matter.

The project aims to bridge the gap between Django and microservices, equipping participants with the necessary knowledge and skills to design and implement robust, scalable, and maintainable microservice architectures using Django.

Licensing

You should be very careful while using the codes/images/datasets in your solution. Any project that uses proprietary code, proprietary software, images or dataset is not a good fit for Educative's Platform. List down all the resources used along with their sources and License information where required.

Skills Acquired

1. Microservices Architecture: Participants will gain a deep understanding of microservices architecture principles, including service independence, scalability, and fault tolerance.
2. Designing Distributed Systems: Learners will acquire the skills to design and develop distributed systems by decomposing monolithic applications into smaller, loosely coupled services.
3. Service Communication and APIs: Participants will learn about designing and implementing APIs for communication between microservices, including RESTful API design principles and best practices.
4. Containerization and Deployment: The project will cover containerization techniques using tools like Docker, enabling participants to package and deploy microservices in isolated, portable environments.
5. Scalability and Resilience: Learners will understand strategies for scaling microservices horizontally and ensuring high availability and fault tolerance in distributed systems.
6. Testing and Quality Assurance: The project will emphasize testing methodologies specific to microservices, including unit testing, integration testing, and end-to-end testing across the entire system.
7. Logging and Monitoring: Participants will gain knowledge of logging and monitoring practices in microservices architectures, enabling them to track and analyze system performance and troubleshoot issues effectively.
8. Security and Authentication: Learners will explore techniques to secure microservices, including authentication, authorization, and securing communication channels between services.
9. Performance Optimization: The project will cover performance optimization techniques for microservices, including caching, load balancing, and optimizing database access patterns.
10. Migration Strategies: Learners will acquire insights into migrating monolithic applications to microservices architectures, including strategies, challenges, and best practices for successful migrations.

These skills will equip participants with a holistic understanding of designing, developing, and deploying microservices architectures, enabling them to build scalable and resilient distributed systems.

Help us improve by sharing your feedback.

Objectives

1. Build agile microservices with Django's power.
2. Design scalable architectures for distributed systems.
3. Master communication between microservices.
4. Deploy and orchestrate microservices with ease.
5. Ensure resilience and fault tolerance in microservices.
6. Optimize performance and scalability of microservices.

Tools and Technologies

1. Python: Programming language used for Django development.
2. Django: Web framework for building microservices.
3. Django Rest Framework: Toolkit for building RESTful APIs with Django.
4. Docker: Containerization platform for packaging and deploying microservices.
6. Git: Version control system for managing source code.
7. PostgreSQL: Relational database management system for data storage.
8. Redis: In-memory data structure store for caching and messaging.
9. NGINX: Web server and reverse proxy server for routing requests.
10. Prometheus: Monitoring and alerting toolkit for tracking system performance.
11. Grafana: Data visualization and monitoring dashboard for metrics analysis.
12. Pytest: Testing framework for unit and integration testing.

Difficulty Level

Intermediate

Completion Time

Considering the intermediate difficulty level of the project, the expected completion time for learners can vary based on their prior knowledge and learning pace. However, as a rough estimate, it is reasonable to expect the project to be completed within 5-10 weeks, assuming regular study and practice.

This time frame allows learners to grasp the concepts of microservices, Django, and related technologies, as well as implement and test the project in a comprehensive manner. However, it's important to note that individual learning speeds may vary, and learners are encouraged to take the time they need to fully understand and apply the concepts covered in the course.

Project Outline

Task 0: Introduction and Project Setup

- Briefly introduce Django and Microservices.
- Overview of the project
- Briefly describe the code files and project structure

Task 1: Building the User Management Module

- Create user models and authentication endpoints (login, logout).
- Implement user registration, login, and logout functionality.
- Add user profile management features.

Task 2: Defining Communication Protocols and APIs between Microservices

- Identify and define communication protocols between the microservices.
- Write code to establish APIs enabling inter-service communication.

Task 3: Implementing the Product Service

Help us improve by sharing your feedback.

- 1. Create product models.
- 2. Develop the Read functionality for products.
- 3. Implement the Create and Update functionalities for products.
- 4. Develop the Delete functionality for products.

Task 4: Developing the Order Management Service

- 1. Design the order management service and define the database structure.
- 2. Implement the Create functionality for orders.
- 3. Implement the Read functionality for orders.
- 4. Develop the Update functionality for orders.

Task 5: Implementing Payment Gateway Integration

- Integrate a payment gateway for secure payment processing.
- Develop APIs and logic for payment transactions.

Task 6: Deploying and Scaling the Microservices

- Containerize the microservices using Docker for easier deployment.

Task 7: Testing and Error Handling

- Implement unit and integration tests to verify the correct functionality of the microservices.
- Develop error and exception management strategies to enhance system stability.

Task 8: Code Cleanup and Performance Optimization

- Refactor the code for improved readability and organization.

ASSUNTO: Carta de Recomendação.

Excelências!

Com os respeitosos cumprimentos.

O departamento supracitado vem por intermédio desta carta, recomendar o Engº **André Hangalo**, formado nesta Instituição, tendo nos anos lectivos 2018 e 2019 desempenhado a função de docente como monitor.

Durante o período em que foi monitor, sempre demonstrou responsabilidade, dedicação, assiduidade, pontualidade, competência e com excelência no desempenho da função docente, o que nos permite recomendá-lo sem nenhuma reserva para qualquer instituição ou concurso a que se candidate.

Por tudo isso, temos a certeza que o **Licenciado André Hangalo**, será uma excelente escolha para vossas Excelências.

Agradeço desde já pela atenção e oportunidade em prestar-vos essa grande e responsável recomendação!

Se tiverem qualquer dúvida, estou à vossa inteira disposição.

Andre Caciano Barros Hangalo [Contractor's Name]
Bairro Santo Antonio
Angola, Huila, Lubango [Contractor's Address]

This Freelancer Employment Contract ("Contract") is entered into between Horizon Dev LLC, hereinafter referred to as the "Company," and Andre Hangalo [Contractor's Name], hereinafter referred to as the "Contractor," collectively referred to as the "Parties," effective as of 26/02/2024 [Date].

Scope of Work

- 1.1 The Contractor agrees to provide programming and development services for the Company.
- 1.2 The specific responsibilities and tasks will be outlined in a separate document or project agreement, to be mutually agreed upon by both Parties.
- 1.3 The Contractor agrees to work a minimum of 15 hours a week and a maximum of 50 hours a week, unless otherwise specified in written or electronic communication.

Compensation

- 2.1 The Contractor will be paid at a rate of \$3.85 per hour for services rendered under this Contract for the first month. After the first month he will receive a raise to \$4.00 an hour, and in the third month up to \$4.25 an hour.
- 2.2 Payment will be made on a bi weekly basis, subject to the submission of an invoice with tracked hours by the Contractor.
- 2.3 The Company will provide the Contractor with all necessary information and materials required to perform the assigned tasks.
- 2.4 Payment will be conducted via Wise, unless otherwise specified.

Performance Evaluation

- 3.1 The Contractor's performance will be evaluated after the first month, then every three (3) months, commencing from the Start Date.
- 3.2 The Company reserves the right to grant raises based on the Contractor's performance, at its sole discretion.

Confidentiality

- 4.1 The Contractor acknowledges that during the course of their engagement, they may come across confidential and proprietary information related to the Company's business, including but not limited to trade secrets, customer lists, and financial information.

4.2 The Contractor agrees to maintain the strictest confidentiality and not disclose or use any such confidential information for personal gain or any purpose other than in connection with performing their obligations under this Contract.

4.3 The obligations of confidentiality shall survive the termination of this Contract.

Independent Contractor Relationship

5.1 The Contractor is an independent contractor and not an employee, partner, or agent of the Company.

5.2 The Contractor shall have no authority to enter into agreements or contracts on behalf of the Company or bind the Company in any way.

5.3 The Contractor is responsible for their own tax obligations, insurance, and any other obligations arising from their status as an independent contractor.

Termination

6.1 Either Party may terminate this Contract by providing written notice to the other Party.

6.2 In the event of termination, the Contractor shall be entitled to compensation for services rendered up to the date of termination.

6.3 The Contractor must give at least 21 days notice of termination.

6.4 The Company must give at least 30 days notice of termination.

Governing Law and Jurisdiction

7.1 This Contract shall be governed by and construed in accordance with the laws of the State of Wyoming.

7.2 Any disputes arising under or in connection with this Contract shall be subject to the exclusive jurisdiction of the courts located in Wyoming.

Please indicate your agreement with the terms and conditions outlined in this Contract by signing below.

Austin Reed
